Smart Home Upgrades For Your Next Project

Maximizing Project Value Through Smart Home Upsells

Home reference photo.

Dear Contractor, win bigger bids with turnkey smart home automation—more profit for you, effortless comfort for your clients.

Offer lighting, shades, climate, and audio that work together. Solvo USA helps you plan the options, price the work, and bring it all together.

Add Upgrade Options

Give clients a clear choice of features that fit their home and budget.

Make Your Bid Stand Out

Show clients how lighting, shades, and climate controls work together to improve comfort and help save energy.

Have A Team Behind You

We handle the automation design, programming, and installation.

You Lead The Build. We Handle The Automation.

Show Them What Their Home Can Do.

Start With Features They Can Picture Using Every Day.

Loxone Touch Pure Display

Lighting and music controls right on the wall.

Set The Room For Dinner Or Guests.

Bring lighting and music together in one setting, with controls that are easy to reach.

Turn A Surface Into A Control.

Touch Surface sits beneath a suitable counter or wall surface to control selected features.

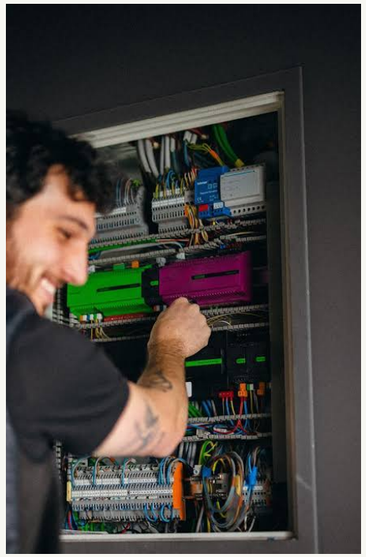

Plan The Whole Home Together.

Bring lighting, climate, compatible shades, and audio into one plan from the start.

01 Talk Through The Project

We review the plans, client needs, budget, and schedule.

02 Define The Scope And Price

We explain the options and put the agreed work into a clear proposal.

03 Coordinate With Your Team

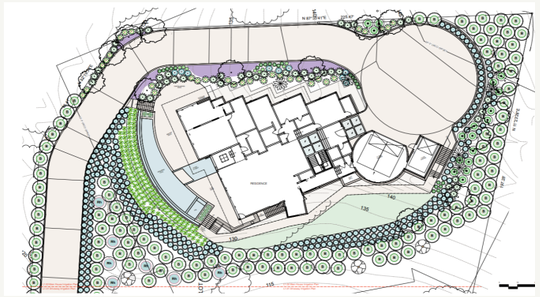

We plan wiring and device locations with the builder and other trades.

04 Install, Test, And Hand Over

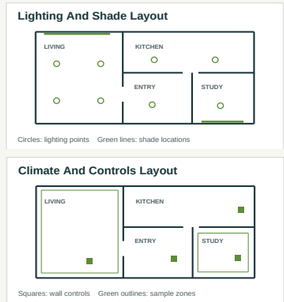

We install and program the system, test it, and show the owner how to use it.

Room-By-Room Planning

We review how clients use each room and coordinate wiring and controls with your trades.
